

Wireless Monitoring MTX

Monitoring

Small and perfectly formed

The MTX and MLTX is our smallest transmitter yet. They use a high precision temperature and humidity sensor which is accurate to +/-2% that is integral to the transmitter thus allowing for a smaller and neater outline.

Available in either a black or white enclosure the MTX transmitter ensures discreet and reliable monitoring in display cases and public spaces as well as stores and archives. It is small and light enough to be easily wall mounted using no destructive fixings and is equally happy standing on a shelf.

If required the MTX can be adapted to include a Lux and UV sensor (MLTX) which provides a more cost efficient monitoring of all conditions in one compact unit.

The MTX is high on specification, quality and value whilst being the ultimate in discreet wireless monitoring.

TECHNICAL DATA

| | |
|------------|--|
| ACCURACY | 2% RH and 0.2°C |
| RANGE | 12 miles line of sight |
| BATTERY | 3 x AAA with a battery life of over 2 years |
| DIMENSIONS | 70mm H x 70mm W x 29mm D, aerial 169mm weight 102g inc batteries |
